

ORAL HEALTH IN MICHIGAN

SB 1013: Training Dental Therapists

CODA Accreditation

NATIONAL ADA/CODA ACCREDITED PROGRAMS

In August 2015, the Commission on Dental Accreditation (CODA), the **ACCREDITING BODY** housed within the **AMERICAN DENTAL ASSOCIATION** for **DENTAL EDUCATION PROGRAMS**, implemented standards for dental therapy education programs. CODA accreditation means a program has achieved a **NATIONALLY ACCEPTED LEVEL OF SAFETY AND QUALITY**. **SB 1013** requires students to graduate from a CODA accredited program.

USING BEST PRACTICES

Dental therapy students are held to the **SAME STANDARDS** as those studying to become dentists. They take the same classes as dental students and must **DEMONSTRATE THE SAME COMPETENCIES** on the procedures they are trained to provide.

SB 1013 allows universities in Michigan the autonomy to **DEVELOP CURRICULUM** and establish entry criteria for students as outlined in CODA's **DENTAL THERAPY STANDARDS**.

The **MICHIGAN BOARD OF DENTISTRY** will create the board examination and licensure for dental therapists (DT).

Q. Can midlevel providers “drill and fill” directly out of high school?

A. NO

The skills needed to be a dental therapist in Michigan would **REQUIRE GRADUATION** from a **CODA ACCREDITED** college or university—three academic years, as well as passing a state licensing exam. Under **SB 1013** DTs would be required to complete 500 clinical practice hours under the direct supervision of a dentist.
